## Assessment Brief for Programming in C -

**ADTs: Dictionary** 

Unit name	Programming in C
Unit code	COMSM1201
Assessment number	4 (3 <sup>rd</sup> fully marked assessment)
Assessment name	Exact/Approximate Dictionaries (ADTs)
Assessment prepared by	Neill Campbell
Assessment type	Coursework
Credit value	<b>25%</b> of 30cp unit
Expected time to complete	Around 1 week, very approximately.
Submission format	Via Blackboard – <b>one</b> .zip file. You can submit as often as you like, old files are automatically overwritten. I'll only mark your latest submission. Any submissions that are late (even by 1 second) are automatically given a late penalty; my feedback will not show this. Penalties are enforced by our systems, not me!
Deadline	13 <sup>th</sup> December 2021 (Monday afternoon, Week 12 @ <b>16:00</b> )
Deliverable	Only one file:  1) A single file entitled dict.zip. Inside the .zip file, give me  Exact/extact.c and Exact/specific.h (and optionally  Approx/approx.c and Approx/specific.h). Submit no other  files — I'll use my own version of e.g. dict.h, spelling.c,  testdict.c, general.c, general.h etc.  2) Make sure these are spelled correctly and have been  compiled in a terminal on a lab machine without warnings  using the full set of warning flags.
Learning outcomes being assessed	<ul> <li>To be able to write a program, given a brief specification that compiles and executes correctly.</li> <li>To be able to convert a simple algorithm into working code.</li> <li>The ability to program in the C99 C standard, and in the style outlined in the house-style guidelines.</li> <li>Understanding how to write ADTs via several different implementations.</li> <li>Understanding Makefiles</li> <li>How to test code using assert testing and the Sanitizer</li> <li>To be able to debug simple programs on your own.</li> </ul>
	To be able to debug simple programs on your own.
Assessment criteria	Conformance to the house-style guidelines, assert testing, short readable functions.
Assessment criteria  Additional resources	Conformance to the house-style guidelines, assert testing, short
	Conformance to the house-style guidelines, assert testing, short readable functions.
Additional resources Support for this assignment Additional advice to students	Conformance to the house-style guidelines, assert testing, short readable functions.  "Live" Q&A sessions, ADT lecture notes, ADT exercises.  8 hours of labs in week 10/11.  Use house-style guidelines.  DO NOT wait until the end to do testing – it will be obvious and have had no impact on the style of the program. If your code doesn't work, put a comment explaining this at the top, and submit it anyway – your style/structure is still worth marks.
